

## Lowest Token Number

### Problem Statement

Given table contains tokens taken by different customers in a tax office. Write a SQL query to return the lowest token number which is unique to a customer (meaning token should be allocated to just a single customer).

INPUT	
TOKEN_NUM	CUSTOMER
1	Maryam
2	Rocky
3	John
3	John
2	Arya
1	Pascal
9	Kate
9	Ibrahim
8	Lilly
8	Lilly
5	Shane

### Output

OUTPUT
TOKEN_NUM
3
